**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims **25, 26, 30 and 31** allowed.

**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method for transmitting useful data in a cycle-based communication system between users of the system via a data bus. Each independent claim identifies the uniquely distinct features:

regarding claims 25 and 26: data pertaining to a current cycle are additionally stored in memory in each message; that the messages transmitted over the data bus in the timeslots of the timeframes are observed by the users of the communication system; that either the identifiers or the data pertaining to the current cycle of the messages are compared with predeterminable values respectively, stored in memories of the observing users, for the identifier and the data pertaining to the current cycle, and at least the useful data of a transmitted message are received by the user only if the identifier and the data pertaining to the current cycle of the message match the predeterminable values, stored in the memory of the user, for the identifier and the data pertaining to the current cycle.

US-5,600,312 disclose conventional data transmission systems, either singularly or in combination, fail to anticipate or render the above features obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
